Help Tips for 'Zero Records' - How To Get More Records

- Don't over-specify: use only the search options you really need -- leave the others blank.
- Exclude "implied concepts": leave out words like 'research' or 'effects.'
- Use more wildcards to search different word endings: use COMPUTER? in place of COMPUTER.
- Check the format of your entry. Follow the Search Tips examples shown on the search page.
- Check for misspelled words.
- Check that you are using parentheses correctly when you combine words with AND, OR, NOT.

For more tips on searching, see the Help page.

BASIC-ABSTRACT:

NOVELTY - A computer (12) receives a text (24) from a submitter (14).
Corresponding to the received text, the computer accesses a **reviewer** database

(40) for retrieving a list of **reviewers**. The list of **reviewers** is then transmitted to an **editor** (18).

DETAILED DESCRIPTION - The **reviewer** database includes information concerning an expertise of each **reviewer**. INDEPENDENT CLAIMS are also included for the following:

(a) peer reviewed research retrieval system;

(b) scholarly research conference organizing system

USE - For electronically conducting and managing peer review process for distribution of scholarly research and for improving processes for publishing articles and organizing conference presentations.

ADVANTAGE - The text and submitter allows the text and review information to be quickly and easily retrieved by participants. Text to be edited is retained in a known place on database, thus loss and forgetfulness with respect to the location, are effectively eliminated. Enables increasing the speed of peer review process and distribution of peer reviewed research. Enables timely identification of required peer reviewed research, hence efficiency of compiling conference schedule is improved.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of scholarly research peer review system.

PLUS Search Results for S/N 10016289, Searched April 19, 2006

The Patent Linguistics Utility System (PLUS) is a USPTO automated search
system for U.S. Patents from 1971 to the present. PLUS is a
query-by-example search system which produces a list of patents that are
most closely related linguistically to the application searched. This
search was prepared by the staff of the Scientific and Technical
Information Center, SIRA.
